

NAPTEC Trust Hub

Project Summary — Client Handover Document

June 2026

OVERVIEW

NAPTEC Trust Hub is a fully live, professional website built for the National Accreditation and Professional Training Evaluation Council. It is publicly accessible and ready for use.

 Live URL: <https://krishna7124.github.io/naptec-demo1/>

PAGES

- **Home** — Hero, services overview, process, stats, and testimonials
- **About** — Mission, vision, core values, and governance structure
- **Process** — Step-by-step accreditation journey
- **Standards** — Quality frameworks and criteria
- **Services** — Full list of accreditation and evaluation services
- **Directory** — Searchable list of accredited organisations
- **Contact** — Google Form for general enquiries
- **Apply** — Google Form for accreditation applications

HOW IT'S HOSTED

The website runs on **GitHub Pages** — a free, reliable hosting platform by GitHub. There are no monthly server costs. Any update pushed to the codebase is automatically live within 2 minutes.

FORMS & DATA COLLECTION

Both the Contact and Apply forms are powered by **Google Forms**. Every submission is automatically saved to a **Google Sheet**, giving a permanent and searchable database of all enquiries and applications.

- Unlimited submissions — no caps or fees
- Accessible anytime from Google Sheets
- Email notifications on every new submission (configurable)

ACCREDITED ORGANISATIONS DIRECTORY

The directory is managed through a simple data file (`orgs.json`). Adding a new accredited organisation requires editing one line in that file — no developer needed for routine updates.
